## GLOBAL GAMING INDUSTRIES

Online gaming can be accessed by anyone with an internet connected device. Each day, about 1 million new internet users come online. Further increasing the number of potential online gamers, yet there are still 3.2 billion people who lack internet access, allowing this growth trend to continue well into the future. However, the online gaming industry faces many unanswered issues. The online gaming market also has a bright future ahead and is expected to reach a total value of USD 180 billion by 2021 as indicated in the chart.

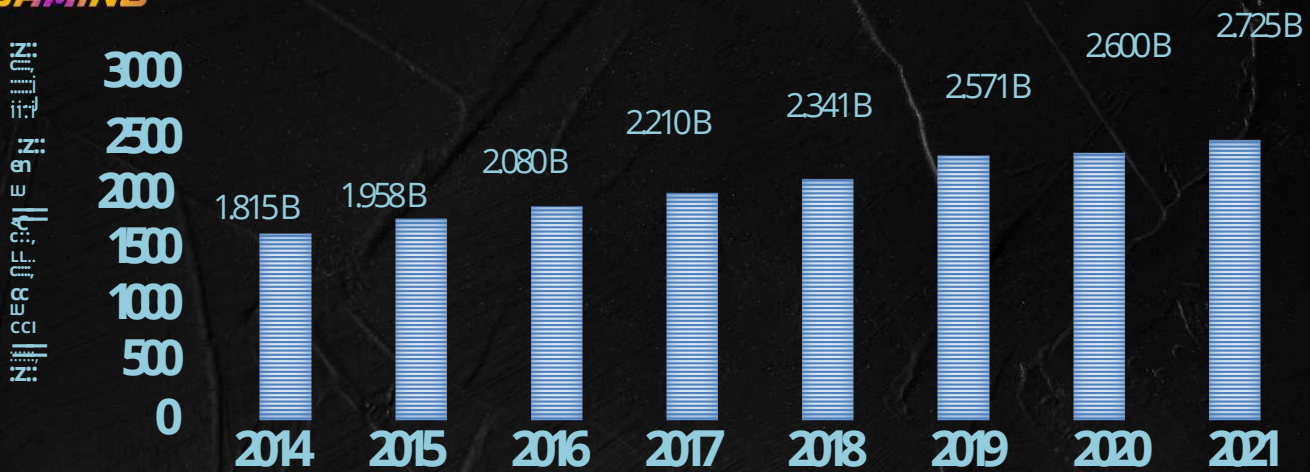

Console games • Pc games • Mobile games

It is not just revenue that makes the gaming market an huge opportunity, but with a total of 2,6 Billion players forecasting, in 2021 every third person will become a gamer.

Trust and popularity in the old gaming model where only big influencers earn money is decreasing. The fairness, transparency and much more opportunities are the signature features of blockchain technology, it may provide an excellent solution to the challenges of online gaming and with the NFTs it is like trading on leverage.

Blockchain itself is a large and rapidly growing industry. Forecasts suggest that the value of the global blockchain technology market will grow to over \$60.7 billion by 2024. The popularization of the internet led to an exponential increase in the size of the global gaming market by creating an entirely new sector; online gaming. Blockchain may prove to be a similar technological catalyst for the global gaming industry.

## OUR CORE VALUES
